Since TRS calls handled via captioned telephone VCO service fall squarely within this definition - i.e. they allow communications between persons with hearing or speech disabilities and persons without such disabilities - we conclude that captioned telephone VCO service falls within statutory definition of TRS.</p> <p>(17)</p>	<p>Sprint has been a CapTel provider, on trial basis, since May 1, 2002. On January 1, 2004, Sprint successfully converted CapTel trial into a FCC-complaint CapTel service, first -ever in the TRS Industry.</p> <p>Speech-to-speech relay service for CapTel is waived by FCC. Availability of SS7 Technology to TRS Facilities	Concluded that if a TRS provider is able to transmit any calling party identifying information to the network, it must provide Caller ID service.	Requirement applies.	Sprint CapTel will have the capability to transmit the 10-digit number and will recognize the ID blocking indicators.  Sprint CapTel will deliver the SS7 technology on February 1, 2004.
Types of Calls	Two Line VCO Two Line HCO HCO-to-TTY HCO-to-HCO VCO-to-TTY VCO-to-VCO	Minimum standards pertaining to HCO are waived.  VCO requirements still apply.	Sprint CapTel supports the VCO calling combinations.
Handling of Emergency Calls	Concluded that TRS providers must use a system for incoming emergency TRS calls that at a minimum, automatically and immediately transfers the caller to an appropriate Public Safety Answering Point.	Requirement applies.	CapTel user dials 9-1-1. Sprint will route the call directly to the most appropriate PSAP.
Answering Machine Retrieval	Concluded that the answering machine and voice mail retrieval are TRS features that must be provided to TRS users. Call Release	<p>Concluded that call release is required under FCC's functional equivalency mandate.</p> <p>Call release allows a CA to set up a TTY-to-TTY call that once set up does not require the CA to relay the conversation. The feature allows CA to sign-off or be "released" from the telephone line without, triggering a disconnection between two TTY users, after the CA connects the originating TTY caller to the called party's TTY through e.g. a business switchboard.</p>	Waived. (¶ 52)	
Speed Dialing	<p>Concluded that speed dialing feature is required under FCC's equivalency mandate.</p> <p>Speed dialing allows users to manually store a list of telephone numbers with designated speed dialing codes in the TRS user's consumer profile.</p>	The requirement was not addressed in the Declaratory ruling.	CapTel telephones have the Speed Dial feature.

FCC 03-192 Appendix D Final Rules	FCC Requirement	FCC CapTel Declaratory Ruling (FCC 03-190)	Sprint's Commitment
Three-way Calling	<p>Concluded that three-way calling is required under FCC's functional equivalency mandate but did not specifically mandate the way such functionality had to provide.</p> <p>The FCC's Order imposing such requirement stated that "generally" three-way calling can be provided "in one of two ways." One way is for the TRS consumer to request that the CA set up the call with two other parties.</p> <p>The second way is to set up a three-way call is for TRS user to connect to two telephone lines at the same time from his or her premises by using the telephone's switch hook (or "flash") button.</p>	The requirement was not addressed in the Declaratory Ruling.	<p>Sprint CapTel users will be able to participate a three way call. Although the person using the captioned phone is unable to establish the three-way call, the called party will be able to do so by utilizing telephone switch hook (or "flash") button on his or her CPE. Thus, Sprint CapTel meets the requirement for three-way calling. (For One-Line CapTel.) For Two-Line CapTel either party can initiate a 3 way call should the user purchased this as a LEC option.</p> <p>Sprint CapTel users will be able to participate in a conference bridge to speak to three or more individuals.</p>
